DEPARTMENT OF THE TREASURY
UNITED STATES MINT
WASHINGTON, D.C. 20220

June 22, 2018

Mr. John Greenewald, Jr.
27305 W. Live Oak Rd.
Suite #1203
Castaic, CA 91384

FOIA Request #2018-05-193

Dear Mr. Greenewald:

This is in response to your May 27, 2018, request under the Freedom of Information Act (FOIA) for a copy of each memo, inventory and description regarding the 4,686,358 foreign gold coins held in storage at the US Mint facility at West Point; any records describing coins other than gold held in deep storage at the US Mint facility at West Point, New York; and any memos, inventories and/or descriptions of other items of value (other than gold or silver bullion or coins) held at the West Point Mint facility for safekeeping, such as documents, artifacts, historical items, artwork, etc.

Enclosed as responsive to your request are the requested records (112 pages).

Please be advised that the vault and compartment letters and numbers have been excised from the United States Treasury Department Mint Bureau Official Joint Seal pursuant to Title 5, United States Code (U.S.C.), Section 552(b)(7)(f).

Should you disagree with this FOIA determination, you may appeal this decision within 90 days from the date of this letter. Your appeal must be in writing, signed by you, and should be addressed to: Mr. David J. Ryder, Director, United States Mint, 801 – 9th Street, N.W., Washington, D.C. 20220. The appeal should reasonably describe the records requested from the denial of access, and should specify the date of your initial request and date of this initial determination. The appeal should also include any supporting arguments as to why you believe the records denied should be released, and should set forth the address at which you wish to be notified of the decision on appeal.

Sincerely,

A handwritten signature in cursive script that reads "Lateau D. Jones".

Lateau D. Jones

DEPARTMENT OF THE TREASURY
WASHINGTON

OIG 88 041

March 29, 1988

MEMORANDUM TO: Donna Pope
Director
United States Mint

FROM: Director of Audit
United States Mint
Office of the Inspector General

SUBJECT: Follow-up on Gold Audit
Assay Results and
Foreign Gold Coins

On April 24, 1987, we issued Audit Report Number OIG 87-42, "Summary Report of Continuing Audits of United States Government-owned Gold as of September 30, 1986". The report stated that as of September 30, 1986, more than 241.2 million fine troy ounces or about 92 percent of the Government's 262.5 million fine troy ounces of gold had been audited. Although no discrepancies were reported, the assay tests of selected gold melts had not been finalized, and foreign gold coins examined by auditors during 1984 and 1985 had not been authenticated to verify the recorded gold content of the coins (991,833.645 fine troy ounces). This report summarizes our follow-up on the results of those matters.

BACKGROUND

Annual audits have been made to carry out the continuing audits of United States Government-owned gold required by Treasury Order No. 234-1, dated June 3, 1975. A three-member committee provided audit guidelines and general direction to gold audit teams. Each year, the committee prepared and issued a report to the Secretary summarizing the results of the continuing audits. The last summary report was prepared as of September 30, 1986.

Treasury Order 234-1 was subsequently cancelled by the Office of the Fiscal Assistant Secretary. In a September 19, 1986, memorandum to the Fiscal Assistant Secretary, we concluded that the Order was unnecessary in view of the authority of the Inspector General to conduct audits of the gold stock under other Treasury Orders. Moreover, annual independent audits of the gold were no longer necessary because virtually all of the gold in the custody of the Mint had been audited and no discrepancies had been found over the last 10 years.

-2-

Because Treasury Order 234-1 has been cancelled, this report is intended to closeout the gold audits performed under that authority.

SCOPE AND OBJECTIVES

The objectives of our review were to follow-up on the test results of selected gold melts examined during 1986 and to verify the recorded gold content of the foreign gold coins examined during 1984 and 1985.

Our review included interviews with Mint officials, examination of documentation, and observation of the X-ray analysis of a 500 coin sample selected from the foreign gold coin inventory. The work was performed at Mint headquarters and the West Point Bullion Depository during calendar years 1987 and 1988; it was conducted in accordance with generally accepted government auditing standards.

In addition to verifying the gold content of the coins, we also made a review to estimate the numismatic value and source of the coins, and to obtain any information pertinent to whether the coins should be sold. A separate report will be issued on the results of this review.

AUDIT FINDINGS

The assay tests of selected gold melts were satisfactorily completed, and the gold content of the foreign gold coins was verified. The assay results on samples taken from unparted bullion and coin gold bars at the West Point Bullion Depository were received and found to be acceptable. As a result, we believe that the recorded inventory balances of 2,799,049.712 fine troy ounces of gold in the unparted bullion and 417,791.164 fine troy ounces in the coin gold bars were accurate and fairly presented.

The tests performed on the foreign gold coins were successful in verifying their gold content. During 1984 and 1985, we counted and weighed the coins. The inventory consisted of 4,686,357 gold coins, most of which were British Sovereigns, stored at West Point. The gold content of the coins is recorded as 991,833.645 fine troy ounces. We also selected a random sample of 500 coins for authentication. During 1987, the 500 coins were transferred to Mint headquarters, where the Mint's

Jim Morgan

GUIDELINES FOR AUDIT OF FOREIGN GOLD COINS
STORED AT THE WEST POINT BULLION DEPOSITORY

BACKGROUND

In 1949 the New York Federal Reserve Bank (NYFRB) transferred 454 bags of foreign gold coins (see Exhibit A) to the New York Assay Office (NYAO) for melting into gold bars. Originally these gold coins were part of a shipment of gold received in April 1944 by a U. S. naval vessel from Dakar, South Africa, for the account of Bank Polski. In July 1949 Bank Polski received 351 United States Government gold bars in exchange for the gold coins. It had been decided that the coins should not be melted and that they be acquired by the Secretary's special account. In 1962 the coins were purchased by the General Fund to be held by the Assay Office in the account "Federal Reserve Bank of New York as Fiscal Agent of the United States (The Treasurer of the United States - Special Gold Custody Account).

In 1962, 3, 712 bags of gold coins in the account "Treasurer of the United States - Special Gold Custody Account" were transferred from the Federal Reserve Bank of New York and deposited at the New York Assay Office for the Account "Federal Reserve Bank of New York as Fiscal Agent of the United States (The Treasurer of the United States - Special Gold Custody Account)." These coins had been purchased from Argentina and Greece in 1947 and 1948. In 1964 the NYFRB withdrew 25 bags from the 1962 shipment leaving 3,687 (3,712-25) (see Exhibit B) at the NYAO. Therefore the total at the NYAO was 4,141 (454 + 3,687) bags of foreign gold coins.

In 1982, concurrent with the physical transfer of the 4,141 bags of foreign gold coins to the West Point Bullion Depository (WPBD) the accountability for the coins was transferred from the accounts of the NYFRB to the WPBD. The Mint accepted the gold coins on a "said to contain 991,833.645 fine troy ounces of gold" basis because the Mint had not opened the bags for inspection, nor weighed the coins since the original delivery to the NYAO.

3. Observe that all joint sealed compartments are secured with two (2) combination locks in accordance with Mint Administrative Directive No. 67.
4. Based on a judgmentally selected sample; verify that receipts and issues of gold were properly authorized and documented. This includes transfers of gold from one location to another within the facility.
5. Evaluate adequacy of physical security over the gold inventory. Consider whether there are any additional security control procedures necessary.
6. Determine whether duties and responsibilities for custody of gold inventory are segregated from record-keeping responsibilities.

AUDIT OBJECTIVES

1. To count and weigh all coins for the purpose of checking the validity of the recorded data.

2. To verify the gold content of the coins on a sample assay basis.

CONTROLS TO BE OBSERVED DURING THE AUDIT

1. The coins are contained in storage boxes located in [REDACTED]. The door to [REDACTED] and the doors to each storage box are under griplock control. Prior to opening any of these doors the ribbon and griplock will be inspected in accordance with the Mint Official Joint Sealing Regulations.

2. [REDACTED] will be kept under griplock control at all times because there are other materials in [REDACTED] which are under the joint control of the Inspector General Staff and the WPBD.

3. If the work is performed in an area other than [REDACTED] the committee will control access to the work area during their absences by use of prenumbered Mint griplocks.

4. Use of Mint griplocks will be recorded on a "Griplock Control" sheet (Exhibit C). This record will show the griplock number, date, and initials of the persons who attached or removed the griplock.

The griplock will be inspected and removed by a Inspector General's Representative and an Institution Representative before re-entering the area.

5. It is the responsibility of both the Inspector General's and the WPBD's representatives to independently and jointly maintain both physical control and accounting control over the gold coins.

6. Upon completion of the audit the foreign gold coins will be stored in the storage boxes in [REDACTED]. Each box will be placed under griplock control in such a way that a Mint Official Joint Seal could be placed without further activity.

AUDIT STEPS FOR AUDIT OF FOREIGN GOLD COINS

All coins should be weighed and counted. Uncirculated coins should be separated from circulated coin and all coins should be separated by country of origin and denomination. Coins of mixed years but from the same country and same denomination can be commingled. For example, five bags of mixed years British sovereigns could be placed in one larger bag after they have been weighed and counted.

If possible all coins should be placed in new bags due to the age of the bags they are now stored in. Audited bags of coins will be placed in the storage lockers in [REDACTED]. Mint tags should be prepared for attachment to the new bags. The tags should show:

- 7-date
- a bag number
 - type of coin
 - number of coins
 - ~~gross troy ounces~~
 - fine troy ounces

The tags on the old bags should be marked on the back with the number of the new bag. The old tags should be kept at the WPBD in a storage locker in [REDACTED].

1. There are 4,141 bags of coins, most containing 1,000 coins, for a sampling universe of 4,141,000 coins. For assay purposes select a random sample of 500 coins to be sent to the Mint's Washington Assay Lab for assay. The sample coins should be selected as follows.

- a. Enter the following data into the programable calculator at West Point: sample size 500, lower limit 1, upper limit 4,141. The 500 random numbers printed out should be arranged in numerical order. Each number will represent a bag of coins. If a number appears more than once, as many coins as times the number appears will be selected from that bag. For example, if the number 342 appears 3 times, 3 coins will be selected from bag 342.

- b. The bags will be identified by number as they are taken out of the lockers in [REDACTED]. The first bag removed will be bag number one. The second bag, bag no. two and so forth. Bag numbers should be clearly marked on the outside of the bags as they are taken out of the lockers.
- c. When a sample bag is opened the coins will be weighed. The auditor will select the sample coin (s) and place it (them) in a sealed and locked box. The sample coin box will remain under audit control at all times. Sample coins should be checked to the "Standard Catalog of World Coins." Any coins with a market value in excess of \$500 should be so identified and kept separate from the other sample coins. Authenticity of these coins should be determined by expert inspection rather than assay.
- d. After all 500 sample coins have been selected they will be sent to the Mint's Washington Assay Lab for assay, via registered mail. The assay results should fall within five ten thousandths (.0005) of their recorded fineness. Refer to Krause Publications' Standard Catalog of World Coins (copy available from Phila's Exhibits and Public Service Division) to identify the recorded fineness of selected coins.
- e. Upon receipt of the assay results the auditor will evaluate the results of the statistical sample as follows:
- Five or fewer errors are considered acceptable because five errors in a sample size of 500, provides a 95% confidence level that the error rate is no larger than 2%.

- If more than five errors occur the auditor must determine the sample confidence level and error rate by referring to Table B 3 in Appendix B of the Defense Contract Audit Manual.
- If two or more errors occur in any type coin other than British sovereigns consideration should be given to further testing of coins from that country.

2. The audit should proceed as follows:

- a. The auditor and Superintendent's representative should open only one storage box in [REDACTED] at a time. They should remove only the number of bags which can be audited during one day. This number will be determined through experience.
- b. The foreign coin bags should be transported to the compartment where the weighing and counting will take place. The bags should remain under the control of the auditor and Superintendent's representative at all times.
- c. One bag should be opened at a time. If it is a sample bag the sample coin(s) should be selected. An inspection of the contents should determine if the coins are circulated or uncirculated.
 - If the coins are uncirculated they should be weighed and counted, and then placed in a new bag by themselves. The coin expert referred to in para. 1.C. on page 7 should inspect these coins to make a final determination of their uncirculated classification.
 - If the coins are circulated each bag should be weighed and counted separately but they can be combined in a new larger bag for future storage.

- If the coins are mixed denominations or from more than one country they should be weighed first and then separated by country and denomination. According to the inventory listing some bags contain a wide mix of coins. If that is the case a variety of new bags will be depositories for similar coins taken from a number of old bags. For example, one new bag may be used to collect Russian Rubles from 10 or more old bags.

3. All weighing must be done on a balanced beam scale which is checked for accuracy at least at the beginning of each day and after lunch break each day.

4. Accountability trays will be used to expedite counting.

5. The auditor and the superintendent's representative should maintain independent records showing:

- from old bag

- bag number (if it has a number)

- type of coin

- number of coins

- weight of coins in grams and in troy ounces

- WPBD coin weight before and after sample coins are taken

- WPBD count, number of sample coins taken, and number of coins placed in new bag.

- WPBD FTO of coins placed in new bag

- difference between recorded and WPBD coin weights (in troy ounces only)

NOTE: The weight on the old bags is shown in grams.
There are 31.103 grams in one troy ounce. Divide the
grams by 31.103 to determine the troy ounces.

6. At the end of each day the auditor and superintendent's
representative should record the following data on a Daily Summary
work sheet:

- date
- the first number and last number of the old bags
counted and weighed
- from the old tags the number of coins and the net
weight of the coins
- the WPBD count of the coins and the WPBD net weight
of the coins
- the net difference in count
- the net difference in weight
- the signatures of the auditor and the superintendent's
representative.

7. At the conclusion of the audit a letter report will be sent
to:

Chairman, Committee for Continuing Audits
of United States owned Gold
Office of the Inspector General
