Enclosure 5A is yours I believe

16/8/61

Phyllis
H. Stoll11DAS?

Encl 10 A is interesting because of the time differences. There could be little doubt the loss of the picture on the TV screen was due to the station being off the air and the time given for this, 8.06 PM, will be accurate to within seconds.

However Mr Gilmore puts the time down as approximately 7 PM.

A further point against Mr Gilmore's timing is that sunset was not until 7.16 PM and it is doubtful whether a light as he describes his sighting would have been visible until well after sun down. Civil twilight ended at 7.50 so the time of 8.06 takes on a more accurate cloak.

No doubt the sighting was a satellite as the direction of travel and position in relation to the sun, to give a strong light-reflection, fit this theory and there is plenty of ironmongery up stairs.

I write this merely to bring out the well known fact that witnesses are sold of our right when it comes to fixing times.

UNIDENTIFIED FLYING OBJECTS
Your 21/1/387 - 27th May, 1965

1. The report you forwarded from Mr. P. Hall-Robb of Western Australia has been investigated by this Department.
2. It is regretted that this is the only report we have received of these particular sightings and, as you appreciate, it is extremely difficult to process material of this nature after such an interval of time, and with such limited details.
3. However, our checks with RAAF Pearce reveal that Vampire night flying took place on these occasions, between the hours of 1830-2230 local, with an average of 80 movements per night. It is quite possible, therefore, that the movements of these aircraft could be the answer to Mr. Hall-Robb's observation.
4. If this is not the case then it is regretted that this Department has no plausible explanation for the reported sightings.
5. It would be very much appreciated if Mr. Hall-Robb could be informed accordingly.

UNIDENTIFIED FLYING OBJECT.

.. The attached letter referring to the sighting of an unidentified flying object in the vicinity of Pakenham East, Victoria, has been received by this office and is referred to you for information and, if necessary, further investigation.

(K.J. Leonard)

For DIRECTOR-GENERAL OF CIVIL AVIATION

Att.

10 Shwaites Rd.
Pakenham East
Victoria

24-4-65

ASB 21/10

The Director General
Civil Aviation Dept.
499 Little Collins St.
Melbourne.

Dear Sir,

Unidentified Flying Object

I wish to report the sighting
of a strange flying object on the 21st
day of April at approx 7.45 am.

The object was dark grey to
black in colour and seemed to be
a non rigid envelope - something like
a cloud ^{or a balloon} a parachute about to
collapse. Assuming that the object was
8 miles away from me its size would

F/ADG(0)

(2)

be in the order of several hundred feet across.

Again assuming that the object was distant 8 miles its speed would have been very great - more than the speed of jet air or planes.

In the short time that the object was in view it manouvered in a violent & erratic manner between ground level and about 500 ft. altitude. Its manouvers gave the appearance that it was being subjected to violent air turbulence or else driven by its own power. It was a cloudy morning and the movements of the object were quite different from clouds in its vicinity.

(3)

The object was in view for approx. one minute. It was first noticed above the ground moving as described. It went down to the ground and disappeared, it rose up and again moved about and again went down to the ground & finally disappeared.

I pointed the object out to my wife & four children. My wife and two children saw it and two other children did not see it.

The object was seen from my house which is located on the high ground approx $3/4$ mile North of Babenham East Ref ~~588~~
508067 on the Cranbourne
1:63360 Military Map and
from here the object was seen

(4)

close South in the direction
of Shoo Wee Reef at an
estimated distance of 8 miles.

I would be very pleased
if you can offer some explanation
as to what this object may
have been.

Yours Faith fully

S. M. Doig

AIR SAFETY INVESTIGATION : RADAR REPORT
UNIDENTIFIED AIRCRAFT

It has come to our notice that on Thursday, 5th November, 1964, at approximately 8 p.m., the radio observer, Mr. M. German on duty at the Brisbane Airport Weather Radar Installation, identified an aircraft bearing 075°T, range 140 miles from Brisbane.

2. Mr. German has been contacted concerning this sighting and he said that he located this echo while doing a search for storm cells and having strobed and identified it as an aircraft, he did not continue to watch it or take much further notice of it. He said that he identified it simply by his experience in picking up aircraft on radar.

3. Also present at the time was Mr. V. Deering, the Officer-in-Charge of Brisbane Avmet Office who, not being a radar operator himself, accepted what he was told by Mr. German regarding the source of the echo. Although Mr. German does not remember which way the echo was travelling, Mr. Deering recalls that it was travelling in a Northerly direction.

4. Mr. German said that since the beam width of the radar is 2½° and it was scanning horizontally, there is no way of estimating at what height the aircraft may have been flying.

AIR SAFETY INVESTIGATION - UNIDENTIFIED
OBJECT

...

The attached report, which originated from Mr. D. MacDonald at Rockhampton, has been taken by tape and transcribed.

Further enquiries today have not revealed any further information, and Port Moresby have advised that there are now no United States aircraft based at Port Moresby. The Regional Director, Port Moresby, is making further enquiries.

5 Wiseman Street,
ROCKHAMPTON. QLD.

7.11.1964

The Regional Director,
BRISBANE AIRPORT.

REPORT OF SIGHTING OF UNIDENTIFIED OBJECT
AT ROCKHAMPTON ON 7th NOVEMBER 1964

On arrival at the Rockhampton Aerodrome for duty at approximately 062045Z, I observed what appeared to be a high flying aircraft tracking across the sky, leaving a clearly defined vapour trail. I was not particularly interested, however, as high flying military flights in this area have been fairly common of late. A track of about 040° and not passing over Rockhampton but at a distance to the North was thought to be not in keeping with the usual flights that pass over the Rockhampton NDB using it as a turning point or abeam Rockhampton to the West in a North and South line.

The customary check of traffic prior to taking over control from Aeradio and Brisbane revealed no high flying traffic, no flight plans and the Unit Log was checked to make sure that there were no flights in progress that had been missed by Aeradio.

At 062055Z the trail was inspected through field glasses from the Tower but no aircraft could be seen. By this time the object had been past for about 3-5 minutes and the eastern end of the trail was almost out of visual range and hard to pick up due to haze which extended about 10° of elevation above the horizon in all directions. The sun was to the North-east and reduced visibility within this general direction due to glare.

About 062100Z a check was made with Mackay and Brisbane A.T.C. Units for any traffic of which Rockhampton may not have been advised and there was none revealed. The matter was advised to Brisbane at this point for S.O.O. D.C.A. Brisbane and the R.A.A.F.

A V100, VH-MVC, was engaged on circuit training at the time and when I became aware that the pilot-in-command was the Chief Flying Instructor of the Rockhampton Aero Club, I requested an estimate of the height of the trail. The pilot's estimate was about 30,000 ft. He had not noticed the forming of the trail, and had not noticed it until I requested an estimate of the altitude.

At the time of this incident there was about $\frac{1}{8}$ - $\frac{2}{8}$ of cirrus type cloud to the far North and a lower formation of similar cloud to the far South. I estimated about 20,000 feet to the South and 25,000 feet plus to the North. There was no cloud anywhere near the trail at the time of its formation. That cirrus which was present was of cirro-stratus and cirro-cumulus type, not at all elongated or fibrous. Up to 07 no elongated or mares tails type of cloud was observed in the local area, although I kept a particular watch on cloud formation. At 2115 a very small patch of cirro-stratus formed adjacent to and at a lower level than the trail. It was very slightly lined on an East-west line. The trail cut across above this small patch of cloud at an angle of about 30°. This gave the appearance to me that the

cloud was being affected by wind of a westerly direction and the trail was not. The upper winds from Gladstone were checked and at 25,000 feet the upper winds were West at 77 kts, 30,000 feet West 90 kts, 35,000 feet West 123 kts, and at 40,000 feet West 120 kts. The small patch of cirro-stratus appeared consistent with the westerly wind affecting it. The vapour trail maintained a direction of about 040° but appeared to be displaced slightly to the East throughout its length over the 30 minutes or so prior to its dispersal.

All details of the direction and height estimates are tabled below. It must be borne in mind that as I had no reason to do so, particular notice was not taken of the incident until some moments after it was first seen.

The trail commenced at about 40° above the horizon North-west of Rockhampton, stretched across the sky to a maximum elevation of about $60-70^{\circ}$ North-east.

Estimated direction 040° M.

Estimated altitude about 40,000 feet.

Formed at 062045Z.

Dispersed by 062120Z.

All other clouds except the small patch of cirro-stratus appeared to be very static, no obvious formings or dissipation taking place.

Object ahead of the trail appeared for a few seconds at the maximum elevation. Silver grey or metal reflecting. Shape not distinguished as too far away and very small. No noise audible.

Surface wind light South-east at the time.

The object covered about $2/3$ or $3/4$ of the sky in about 6 minutes. There was a gap of clear sky behind the object equivalent to about 5 times its own diameter before the trail commenced to form. The trail appeared to be of a double nature for about a quarter of its length behind the head, where it commenced to form into one single trail.

The speed of the object appeared consistent with that of a Canberra type aircraft at high altitude or possibly slightly faster. It is considered that a free drifting object (e.g. a stray balloon) would not have moved at this speed, even with the relatively high velocity winds prevailing, and would have moved in a more easterly direction being blown by the wind.

REGIONAL DIRECTOR,
DEPT. CIVIL AVIATION,
PORT MORESBY.

UNIDENTIFIED FLYING OBJECT REPORT. KAVIENG.

An unidentified flying object was sighted in the Kavieng area at approximately 1845 EST on 12/8/64.

The manager of New Guinea Company telephoned the Officer in Charge of this station at approximately 1840 and advised of a white light moving across the sky in the vicinity of the Kavieng Harbour.

At 1843, the Officer in Charge, along with other responsible citizens observed a white light moving across the sky from 1843 until it disappeared due to distance at 1851.

The observers were facing in a Westerly direction and the object was proceeding on a South to North track, running parallel with the Kavieng foreshore.

The appearance of the object was similar to a bright star. It was a white light, but due to darkness, no visible means of support were evident. A white light was the only object sighted. Conditions at the time were a fine and clear starry night.

The height and speed of the moving object was difficult to ascertain but could be compared favourably with an aircraft of the B50 type, cruising at 15000 to 25000 feet. The apparent nearness and the angle of sighting would tend to substantiate this. The angle of sighting was approximately 50/60 degrees from the horizon.

The reference to an aircraft is only a hazarded guess as the object could have been much higher, in which case it would naturally have been travelling at a much greater speed

All that can be stated as definite fact is that a bright, white light was sighted at an angle of 50/60 degrees over the Kavieng Harbour area, travelling in a South to North direction from approximately 1840 until 1851 EST on 12/8/64.

UNIDENTIFIED FLYING OBJECT

The following report was received from M.V. Burwah:-

"On 27.4.64 at 1240Z in lat. $36^{\circ}36'S$ $127^{\circ}22'E$ a bright starlike object was sighted, in a position close to Sirius, and stationary. It was about the same magnitude as Sirius. The object first moved south at high speed, then east, curved north and then curved to a southerly heading and disappeared at 1245Z. At the time there was 4/8 cloud with base 3500 feet.

The object was above the cloud and appeared to follow the cloud lanes."

There were no stars or planets which could have been confused in the position quoted. The possibility of this being the satellite Echo I was considered but the erratic moves discounts the idea. Likewise wind finding balloons might have been observed, but the distance from the nearest station is such that any balloon should have burst before it would have reached a position where it could be sighted and in any case the upper winds were not favourable to the necessary direction of travel.

A similar sighting was made on the same date last year 27.4.63 within 100 miles of the same position.

PERTH.

Dear Sir,

I would like to report the sighting of an object this morning of which I was unable to identify. I have listed a general description under the headings below.

<u>Sighting</u>	9.57 a.m.
<u>Height</u>	About 2,000 - 4,000 ft.
<u>Colour</u>	Brown
<u>Description</u>	It was cigar shaped and travelling sideways. It would resemble a large bird but seemed to be travelling too fast and also the direction was straight. It did not appear to be an aeroplane as there was no apparent noise associated with the object and also was not shaped like an aeroplane. I first sighted it after it had passed overhead and it was between an overhead position and the horizon before I observed it. I then proceeded to watch it for about 10 secs. or more before I rushed inside to get a pair of binoculars, however by the time I came outside again it had disappeared.
<u>Direction</u>	N.N.W
<u>Speed</u>	Around about 400 mph.
<u>Size</u>	About 40' long.

Yours faithfully,

Sgd. (R.V. MARSH)

12th March, 1964.

The Regional Director,
Department of Civil Aviation,
St. Georges Terrace,
PERTH. W.A.

UNIDENTIFIED OBJECT.

The following has been received from my Officer in Charge at Kalgoorlie.

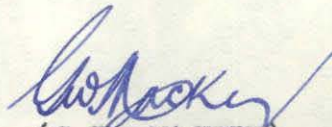

"Following received from Balladonia Motel today. Three weeks ago a hot night at approximately 9.30 pm a light with the appearance of a burning tree trunk was noticed at an angle of 45 degrees and southeast of the Motel. Last Monday week one large and one small light appeared at approximately same time and place appeared to sink to ground and then rose again and disappeared. Sunday night and last night same lights appeared they appeared to move in the direction of Esperance. These last sightings were confirmed by Rabbit Trappers who were 50 miles further out. The Motel Prop. would like any information possible on this phenomenon."

Advice has been furnished to Kalgoorlie that there was no information available to identify the sighting report, but it would be forwarded to the appropriate authority, who would advise Balladonia in due course.

There is no astronomical explanation for this sighting, nor would it have been a satellite.

It could possibly be a reflection of car lights on a slope being focused on a cloud, similar to a cloud search light, but in view of the fact that two sightings were made from distances fifty miles apart, it seems difficult to believe that a light spot on a cloud would be sufficiently intense to be seen at such distances. There have been bush fires in this area, but again it is unlikely that a single light would be seen, but if there was any visible effect at the distances said, it would be more likely a reflected glow from the sky.

This leaves only the possibility of Aircraft operating in the area.

(G.W. MACKEY)
DEPUTY DIRECTOR.

The Minister of Defence

Dear Sir,

I have at last decided that I should report something I heard over my home about 12 months ago. The delay in reporting it is because I have been frightened of being laughed at, but I heard it and one son later heard it and I leave it to you to decide what it could be. It was about the time the odd ball was found near Broken Hill.

On two occasions I woke to hear a frighteningly loud bell like whining noise flying over the house. The third occasion I did not hear it quite so loudly but a son and family said they heard it and it made the little children (who are not unduly nervous) cry, and their father to comfort them said "Its just a big truck" but he only said that so they wouldn't be frightened. He like myself had no idea what it could be. It appeared to be flying over head at terrific speed S.W. to N.W.

I live about 1½ miles north of Minlaton on the Curramulka Road.

I have stayed at Elizabeth where jets of all kinds fly over head but I have never heard anything like this. What it was I don't know but I quite made up my mind that the next time I heard it even if in the middle of the night I'd do my best to get out and see it (It went over about 2.30 a.m. twice and one about 6 p.m.)

My daughter was a plane spotter during the war years, couldnt something similar be used in peace time with so many strange reports going the round.

Yours sincerely,

Sgd. Vera M. Cook

My son lives several 100 yds NW of me.

Dear Sirs:

I would appreciate very much your answering the following questions:

1- What is the official Australian Government policy concerning unidentified flying objects (UFOs)?

2- Does the Australian Government inform its public of all the facts concerning UFO reports, including military sightings?

3- Which government agency in Australia handles UFO reports and what are the conclusions, if any, of this agency as to the nature of these flying objects?

Thank you.

MEMORANDUM FOR :

Director General.

Sighting of Unidentified Object in Sky

The following report has been received from Mr. C. H. Gilmore of 5 Western Avenue, South Perth, W.A.

On the 10th January, 1962 at approximately 7 p.m. Mr. Gilmore was watching T.V. when the screen suddenly blackened, a number of diagonal lines appeared and then the picture re-appeared.

At the same time Mr. Gilmore's son, aged 18 $\frac{1}{2}$, called out to his father saying "come and see the object in the sky".

Mr. Gilmore reported the object as a light like the original "Sputnik" but larger. The light travelled across the sky from south-west to north-east. The light did not have any tail.

2. A check with ABW Channel 2 indicates that this station was off the air for a few seconds at 8.06 p.m. on the day in question. This break was caused by the failure of the link to the transmitters site and the time delay involved in changeover to the secondary link.

3. Submitted for information.

Enclosed is a copy of a letter from one of these U.F.O. Men. As we have passed the flying saucer buck to the R.A.A.F. you may as well add this to your collection along with his international postal note.

I am also enclosing a copy of the letter which I am sending today to Mr. Fitch.

All the best to you and yours,

(Rex Banks) *RB*

21/1/387

16th November, 1961.

DESFATCHED

Mr. C.W. Fitch,
6526 Carnegie Ave.,
Cleveland 3,
OHIO. U.S.A.

Dear Mr. Fitch,

You wrote to this Department recently seeking details of an unidentified flying object sighting by the Rev. Lionel Browning, of Cressy, Tasmania.

All U.F.O. reports in Australia are handled by the Royal Australian Air Force. Contrary to the newspaper reports, and although we did have some initial contact with Mr. Browning, we did not make a full investigation of his sighting but merely passed on details (time, place, what he saw, etc.) to the R.A.A.F. for whatever action they considered necessary.

I have forwarded a copy of your letter to Mr. H. Raynor, Director, R.A.A.F. Public Relations, Canberra, A.C.T., in the expectation that he might be able to send you a full report on the sighting.

Hoping this meets with your approval.

I remain,

Yours faithfully,

(Rex Banks)
Assistant Public Relations Officer.

6526 Carnegie Ave.
Cleveland 3, Ohio, U.S.A.
August 7, 1961

The Civil Aviation Dept.
Canberra, A.C.T.
Australia

Gentlemen:

In THE EXAMINER of Launceston, Tasmania on Sun. Nov. 18, 1960 reference was made to the sighting of an unidentified flying object as reported by Rev. Lionel Browning, of Cressy, Tasmania.

For your information I quote from the news item:

"Mr. Osborne said that his department did not interview everyone who claimed to have seen unidentified flying objects. But if no natural explanation was found, a more detailed investigation was made.

This action was being taken as a result of a written report which the Civil Aviation Department had made on Mr. Browning's experiences."

The subject of unidentified flying objects is one in which I have been interested in collecting information on for several years.

This sighting appears to have been a particularly good one and for that reason I would like to obtain a copy of the written report referred to above since I am interested in reading your evaluation of it.

If there is a charge to obtain a copy of this report will you kindly advise me as to how much it is and I will send you an international Postal Money Order in payment for one by air mail on receipt of your reply. I am enclosing International Postal Coupons in sufficient amount to enable you to reply to this letter by Air Mail.

I will thank you for an early reply in reference to this request.

Yours very truly,

C. W. Fitch

MEMORANDUM for -

DIRECTOR-GENERAL:

Unusual Aerial Phenomena.

...

The attached copies of two reports concerning unidentified aircraft movements in the vicinity of Bamboo Springs (Lat. 22°04" S. 119°37" E) and Warrie (Lat. 22°15" S. 119°34" E.) on 1st August 1961, are referred for your information and the necessary action.

Our enquiries indicate that there were no civil aircraft reported in the area at this time.

(D. McDonald.)
for Regional Director.

MEMORANDUM FOR:

Regional Director,
SOUTH AUST./NORTHERN TERR. REGION.

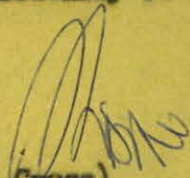

AIRWAYS OPERATIONS: UNIDENTIFIED OBJECT

Reference - Your 14/1/24 of 15/6/21.

By way of courtesy we have used your subject title though we are hopeful that there are no unidentified objects in Airways Operations.

2. There are two possibilities that readily come to mind, firstly, such as the scientific balloons released at Mildura and secondly, one of the daylight visible planets.

3. You may care to pass on the above suggestion to the worthy Brothers together with the note that detailed follow up of similar reports in Australia have failed specifically to identify the object sighted.

13 JUN 1961

Report of an Unidentifiable object seen over Tennant Creek on the morning of May 29th, 1961.

The object was seen at approximately 1125 am by Bro. Francis & Ian Farquason? How we came to see the object was that we went outside to see what type of Aircraft was flying over, as we were watching the A/C which we thought to be a Bristol Freighter, we saw ahead of and above slightly N.W. of the A/C a white object which looked very much like a met Balloon, the object seemed to be much higher than the A/C and there paths seemed to cross just as the A/C was making a slight turn on to the Darwin leg. The object was travelling almost 090, this is an estimate. It seemed to be travelling slowly and at times seemed to be at a standstill. Ian lost sight of it when he went inside to answer the phone and was not able to pick it up again, I watched and three times when I looked away it took some locating again, I went inside to attend to the phone call and on going outside again could not find the object, phoned D.C.A. to find out if they knew what it was, but they had not seen it, nor had they any knowledge of any other A/C in the area.

Bro. Francis.

Tennant Creek. 29th May, 1961.
