Public records searches over the internet appear to confirm that a DAVID HAHN (born 1976) did attempt to build a nuclear reactor in Commerce Township Michigan when he was 17 years old. Internet searches did confirm the existence of a book about the incident written by Ken Silverstein, a Harpers Magazine editor in Washington, DC. The internet articles indicated HAHN did join the US Navy and served aboard a nuclear powered submarine.

This information is being passed to Cleveland to conduct an interview of [redacted] telephone number [redacted] the source of the information that [redacted] now possesses a nuclear reactor. This telephone number is apparently a cellular telephone issued from the [redacted] area. Upon arrival the residence of Hahn, writer activated both a radiation Pagers unit and a SOR/T electronic personal dosimeter in effort to determine whether any radiological emitting sources may be detected at or near the front door of Hahn's apartment. While nobody responded to knocking on the door of apartment 204, a significant gap was visible beneath the front door and no deflection whatsoever occurred on either radiological monitoring device. [redacted] advised Agent that [redacted] had also conducted radiological monitoring at this residence in early February in response to a complaint. This prior monitoring also yielded negative results.

Writer dialed a cellular telephone number believed to be that of Hahn and left a message requesting a return call. Within approximately thirty minutes, writer received a call from Hahn. Hahn acknowledged that he was indeed David Hahn of 42490 Green Valley Drive, Clinton Twp and inquired of the nature of our business. Writer asked Hahn about his history of experimenting with radiologicals and inquired whether Hahn was continuing to collect, store, or experiment with radiological emitting devices. Hahn was very insistent that there was no presence of radiologicals within his apartment and that he has not experimented with them in approximately ten years. Hahn also admitted having published a book entitled "Radiological Boy Scout" in the early 1990's regarding his passion and experimentation of with radiologicals. Hahn advised writer that he (Hahn) was currently out of town but anticipated being available to visit with Agents in the next few days. Writer provided SA [redacted] with Hahn's telephone number in effort for SA [redacted] to initiate a face-to-face interview.

b6
b7c

Based upon the above-stated investigation it was agreed by members present that no imminent threat existed with regard to allegations that Hahn possessed a nuclear reactor within his residence. Members also agreed to attempt a personal interview of Hahn as soon as possible to fully vet captioned threat. Writer considers captioned lead covered with regard to the possible presence of radiologicals, pending further information being revealed.

SUMMARY

Synopsis:
Information received from Shelby Twp. P.D., regarding David Hahn who may be involved with radioactive material.

Sensitive Investigative Matter

Facts of Incident:
Det. [Redacted] Shelby Twp. P.D., advised that he received information from Probation Officer [Redacted] regarding David Hahn, who in 1994 attempted to build a mini nuclear reactor. Probation Officer [Redacted] advised that Hahn has numerous burn marks on his face, which are similar to the marks Hahn had on his face when he was building the reactor. Det. [Redacted] stated that perhaps Hahn is again attempting to build a reactor or is using radioactive materials. Det. [Redacted] believes Hahn is currently on probation for drug possession.

A search of David Hahn on the Internet revealed that Hahn is known for his attempt to build a breeder nuclear reactor in 1994 in his backyard shed in Commerce Twp., MI at age 17. The reactor never achieved critical mass; however, it did emit dangerous levels of radioactivity. Hahn is nicknamed the "Radioactive Boy Scout" and the subject of a book by the same name. Also according to the Internet, Hahn was arrested in August 2007 in Clinton Twp., MI for larceny, in relation to a matter involving several smoke detectors, allegedly removed from the halls of his apartment building. The arrest photo for this incident shows that Hahn's face was covered with sores, which investigators believed were possibly from exposure to radioactive materials. When Hahn built the mini reactor in 1994, he used chemicals from smoke detectors.

AN FBINET/ACS check revealed that Hahn was interviewed by the FBI in 5/2007, pursuant to a [Redacted] lead in [Redacted]
