

# Athena Progress - December 15, 2015 - 11:30am

## Minutes:

- 1) none

## Achievements:

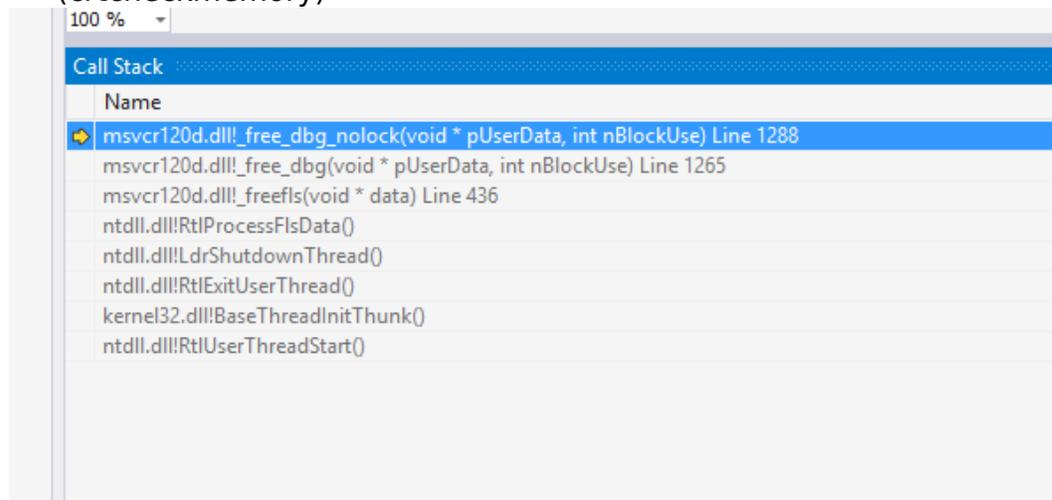

- 1) Changed name - HIBERNATETIME -> HIBERNATIONDELAY
- 2) Added IE\_PROXY\_ADDRESS - to builder/tasker/parser
- 3) Added WPAD\_PROXY\_ADDRESS - to builder/tasker/parser
- 4) Install twice - fixed reset issue (validate data file exists)
- 5) State files being left behind - fixed
  - a. added criticalsection to init
  - b. multi-commands adding state w/o delete
- 6) Validated secure delete - added WRITE\_THROUGH
- 7) Added unload shell code to host - to allow service to restart
- 8) Validated win offline install - win7-64/xp-32

## Test Status:

- 1) lin offline - not completed yet
- 2) Test Proxies - configuring Squid

## Issues:

- 1) X64 command module ls not stable - exception - TestCommandEngine (crtcheckmemory)

- 2) TestCommandEngine - web not catching unload (this may be a multi-command batch issue)
- 3) Communications issue - GETs with no POSTs (CTRL-C on TestCommandEngine - causes server to not process POSTS?)
- 4) Ssltransport - "activityi" - is this intentional or a misspelling
- 5) Ssltransport - "matchtype=p" happens a lot
