2. Localized release of metallic ions. In the body, various metallic ions act as cofactors of enzymes and stimulate a chain of reactions associated with cell signalling pathways towards tissue equilibrium [].These properties, far from specific, are reflected in the very wide range of pathological conditions in which metallic ions are involved.

Searching A Quantum Phone Book - Cryptome

[\[https://cryptome.org/jya/qshake.htm\]](https://cryptome.org/jya/qshake.htm)

An exhaustive search would need to try an average of $2^{55} = 3.6 \times 10^{16}$ keys before hitting the right one. This would take more than 1 year even if one billion keys are tried every second. By comparison, Grover's algorithm would solve the problem after quantum-DES enciphering the known clear text a mere 185 million times. . .
